

LET'S COMPARE

The thing is all cleaning companies claim to be the best. Well nowadays to be the best you need to be a green company. Well as "THE LEADER IN GREEN CARPET CLEANING we reign supreme. AND, we have the facts to back it up. You can decide.

Bonnet
(DRY CHEMICAL)
Shampoo
Dry Foam
Steam Cleaning
(HOT WATER EXTRACTION)

WATER CONSUMPTION

Some carpet cleaners use as much as 30 gallons of water to clean the average home. Wow! Now that's a bath. No wonder it takes so long to dry. That's a lot of water. Oxycleanfresh® can do as many as 30 homes with 30 gallons. Now that's being ENVIRONMENTALLY FRIENDLY!!!!

DRY TIME

Other carpet cleaners use so much water to clean that the carpet can be damp for days under your feet. Oxycleanfresh® dries fast 60 minutes fast leaving carpets dry to the touch. SOGGY SOCKS are no more.

NO STICKY RESIDUE

The chemicals used by most carpet cleaners have soaps/detergents that leave a "sticky residue" behind which can help in the carpet quickly becoming re-soiled. Oxycleanfresh® is a proprietary solution that is 99.5% DETERGENT FREE so sticky residue loses its quotation marks because it is no more.

NO TOXIC CHEMICALS

Don't be alarmed toxic chemicals we refer to are the kind found in the average home. It's just that most carpet cleaners bring it in large volumes and in a short time span. Oxycleanfresh® is blended from ingredients that naturally clean and help to improve the health of your home.

NO HARSH ODORS

Most carpet cleaners don't leave harsh odors behind but that's because fragrance is added to the chemicals to MASK the harsh odors. Oxycleanfresh® has no fragrance because Oxycleanfresh® has no harsh odors.

APPROVED FOR WOOL

Thing about wool is, it's very resilient so the average carpet cleaner won't do visible harm to your wool carpet after a cleaning or two. However, over time you will see the effects of cleaners not approved for wool. Oxycleanfresh® uses WOOLSAFE APPROVED® ingredients.

ENVIRONMENTALLY FRIENDLY

The more water that is used to clean carpet the longer it takes to dry. According EPA studies "...if wet for more than 4 hours the risk of mildew contamination is greatly increased. Oxycleanfresh® uses ingredients that eliminate 99% of mildew.

GREEN SEAL CERTIFIED®

Most carpet cleaners are ill equipped to provide true green cleaning services simply because of the sheer volume of water they used, or the type of chemical that must be used with a particular method. Oxycleanfresh® only uses natural and GREEN SEAL CERTIFIED® solutions.
